ABSTRACT

With the growth and increasing complexity of the State University System of Florida, a growing need has developed for a convenient and authoritative source of information with respect to the operations of the System and the individual universities. This FACT BOOK is designed to meet this need. It contains pertinent information by institution and in summary form for the System regarding enrollment, degrees, programs, faculty salaries, and facilities, as well as historical background on each of the nine universities. Comparative data on other states are provided where such material is available and pertinent. In general, the data cover the past six years and, where appropriate, a six-years' projection is made. Supplementing this information will be the Fact Books, Catalogs, and the Faculty Handbooks of the individual universities.

FACT BOOK

STATE UNIVERSITY SYSTEM OF FLORIDA

FOREWORD

With the growth and increasing complexity of the State University System of Florida, a growing need has developed for a convenient and authoritative source of information with respect to the operations of the System and the individual universities. This FACT BOOK is designed to meet this need.

The publication is designed to answer questions most frequently asked by persons both inside and outside the University System. The FACT BOOK should be particularly helpful to members of the Legislature and to State agencies, as well as to the members of the Board of Regents and its staff and the university administrator, faculty member, student and parent.

The FACT BOOK contains pertinent information by institution and in summary form for the System regarding enrollment, degrees, programs, faculty salaries and facilities, as well as historical background on each of the nine universities. Comparative data on other states is provided where such material is available and pertinent.

In general, the data covers six years of historical data and, where appropriate, a six-years' projection. It is planned that the publication will be revised at least once each year so that the information will be as current as possible. Replacement sheets will be distributed at appropriate intervals and should be inserted in the book.

Supplementing the information contained herein will be the Fact Books, Catalogs, and the Faculty Handbooks of the individual universities.

This first effort is not intended to provide an exhaustive range of information, but it is hoped that with experience its contents can be expanded and refined. Suggestions as to modifications or additions will be appreciated, and should be addressed to the Director of the Management Information Systems, 107 West Gaines Street, Tallahassee.

STATE UNIVERSITY SYSTEM OF FLORIDA

Glossary

Enrollment - Full Time Equivalent (FTE)

Enrollment computed by dividing a constant student credit hour load into the total student credit hours produced. (15 hours for undergraduate and 12 hours for graduate)

Enrollment - Head Count

Total number of students enrolled regardless of the number of credit hours.

Educational and General

The educational functions of a university and those general activities which directly serve those functions. Included would be instructional departments and colleges, state-supported research activities, university administration, library, operation and maintenance of physical plant and organized activities related to instruction. Not included would be auxiliaries, contracts and grants, debt service, scholarships and loans, etc.

FTE

Full time equivalent.

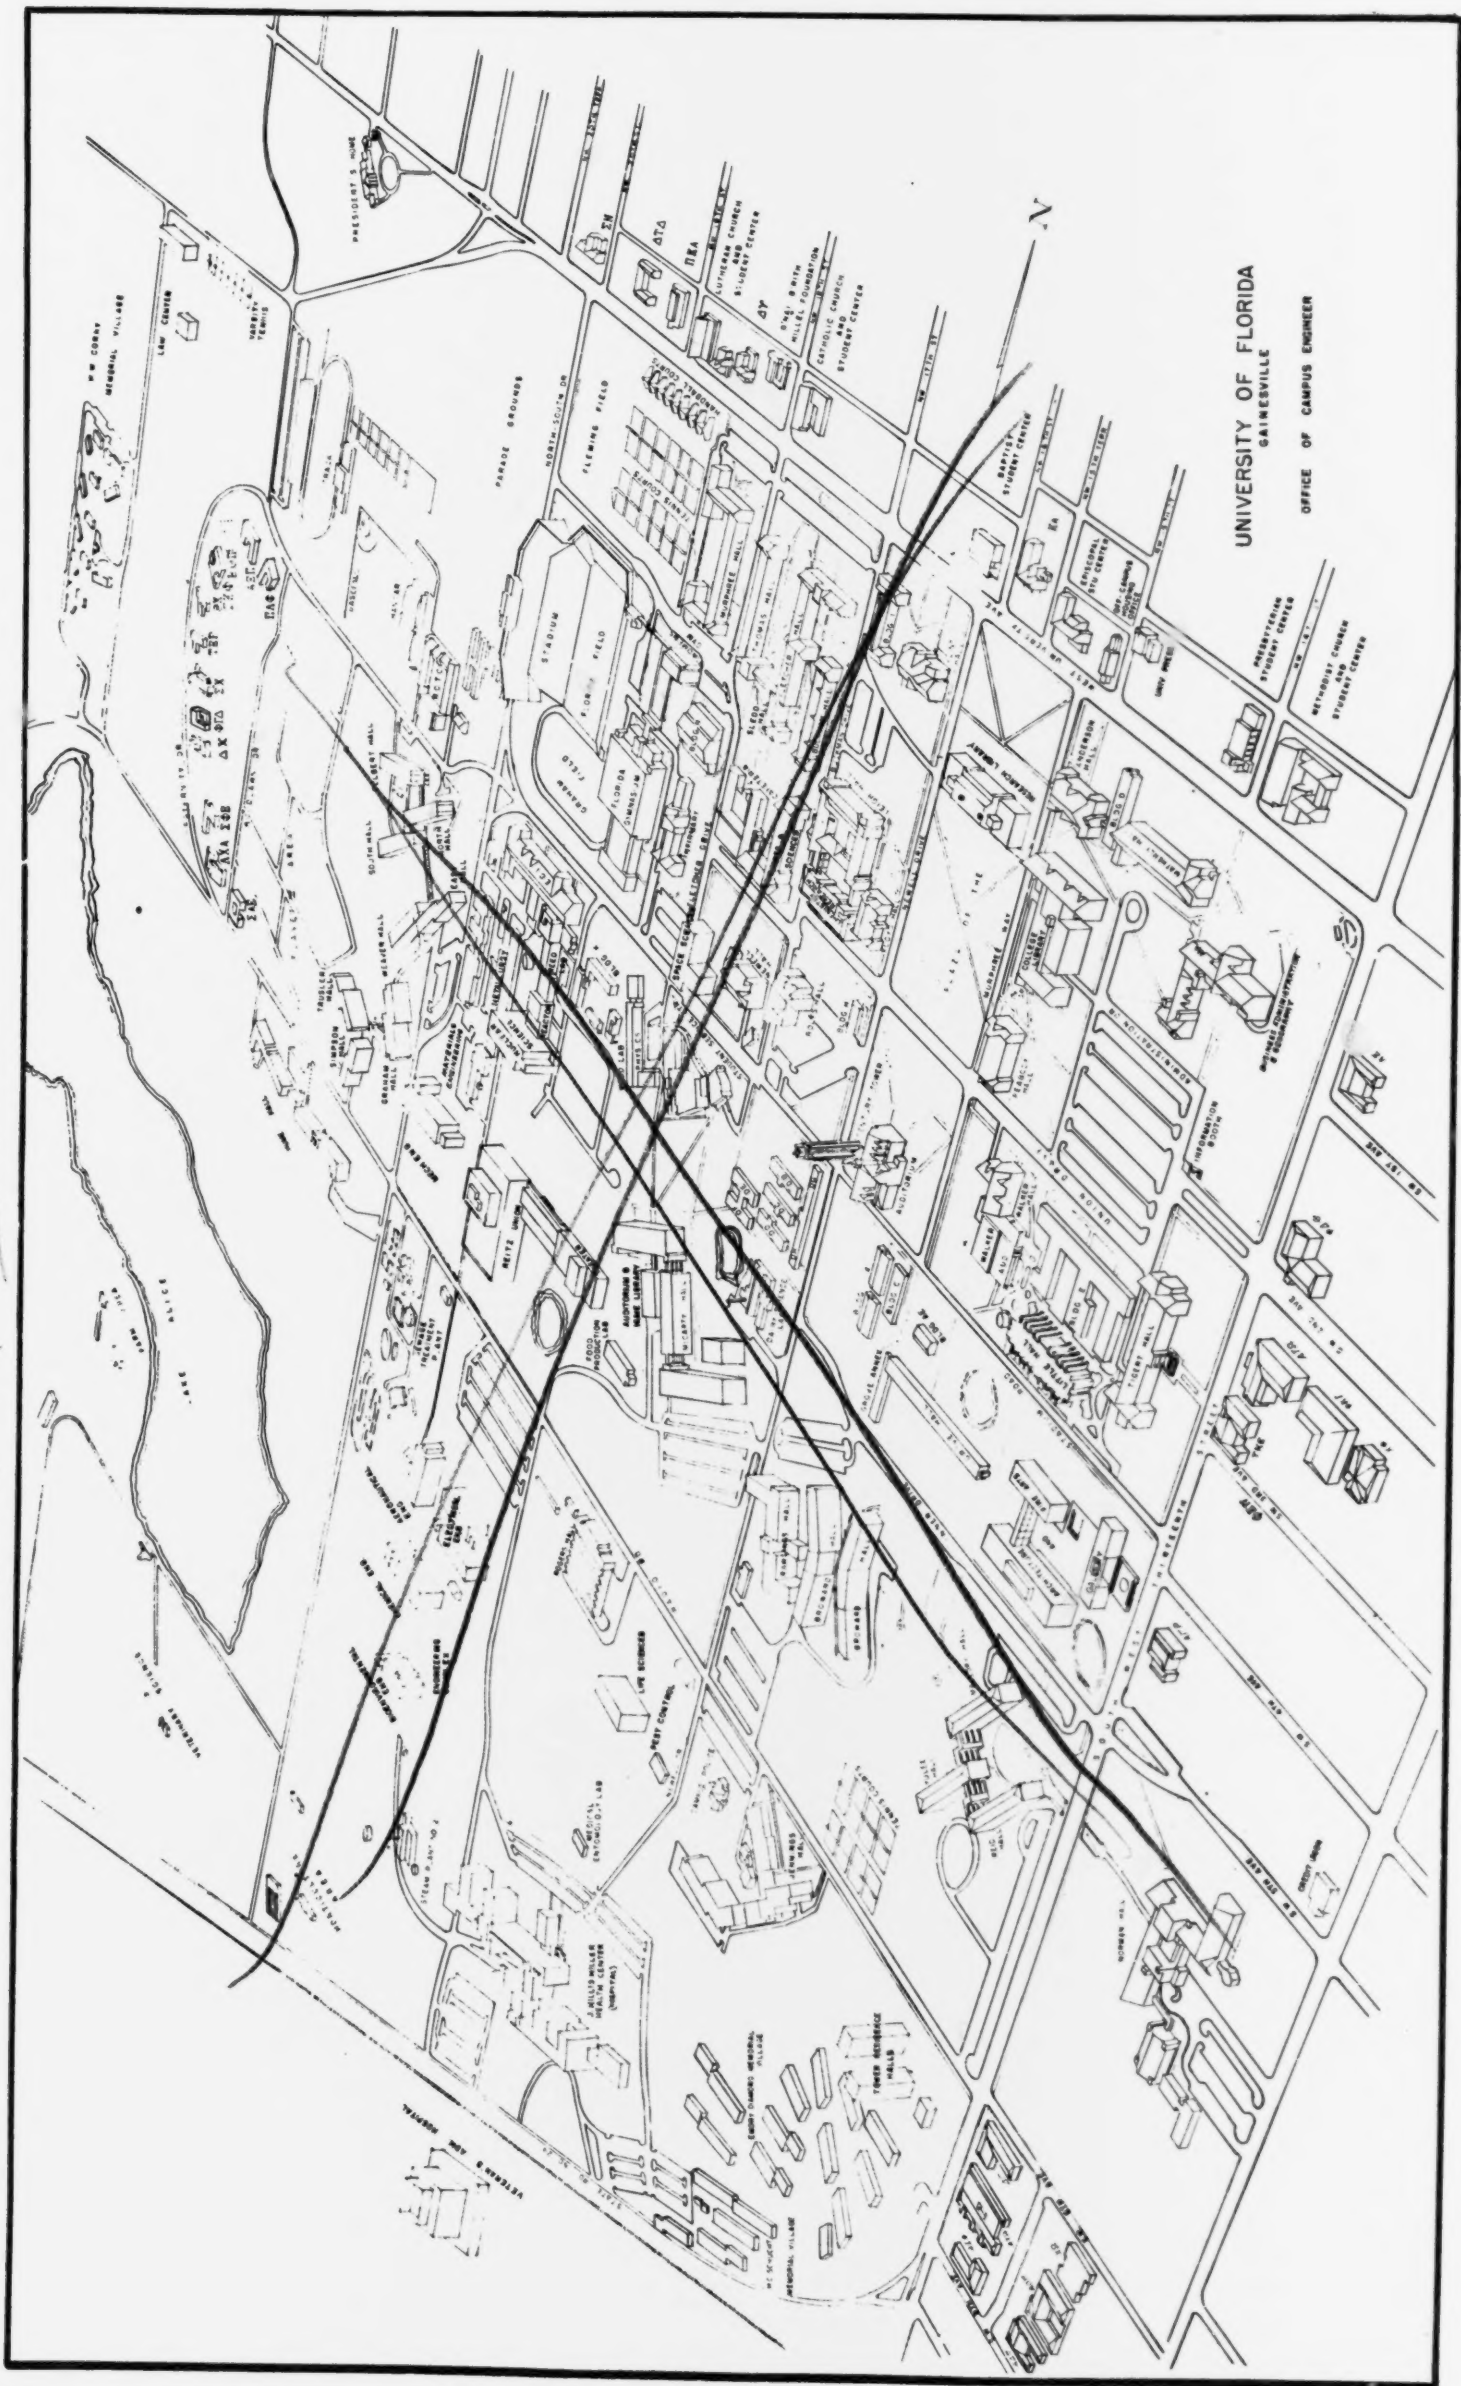

General Revenue Funds

Those funds provided from the tax revenues of the state which are appropriated by the Legislature.

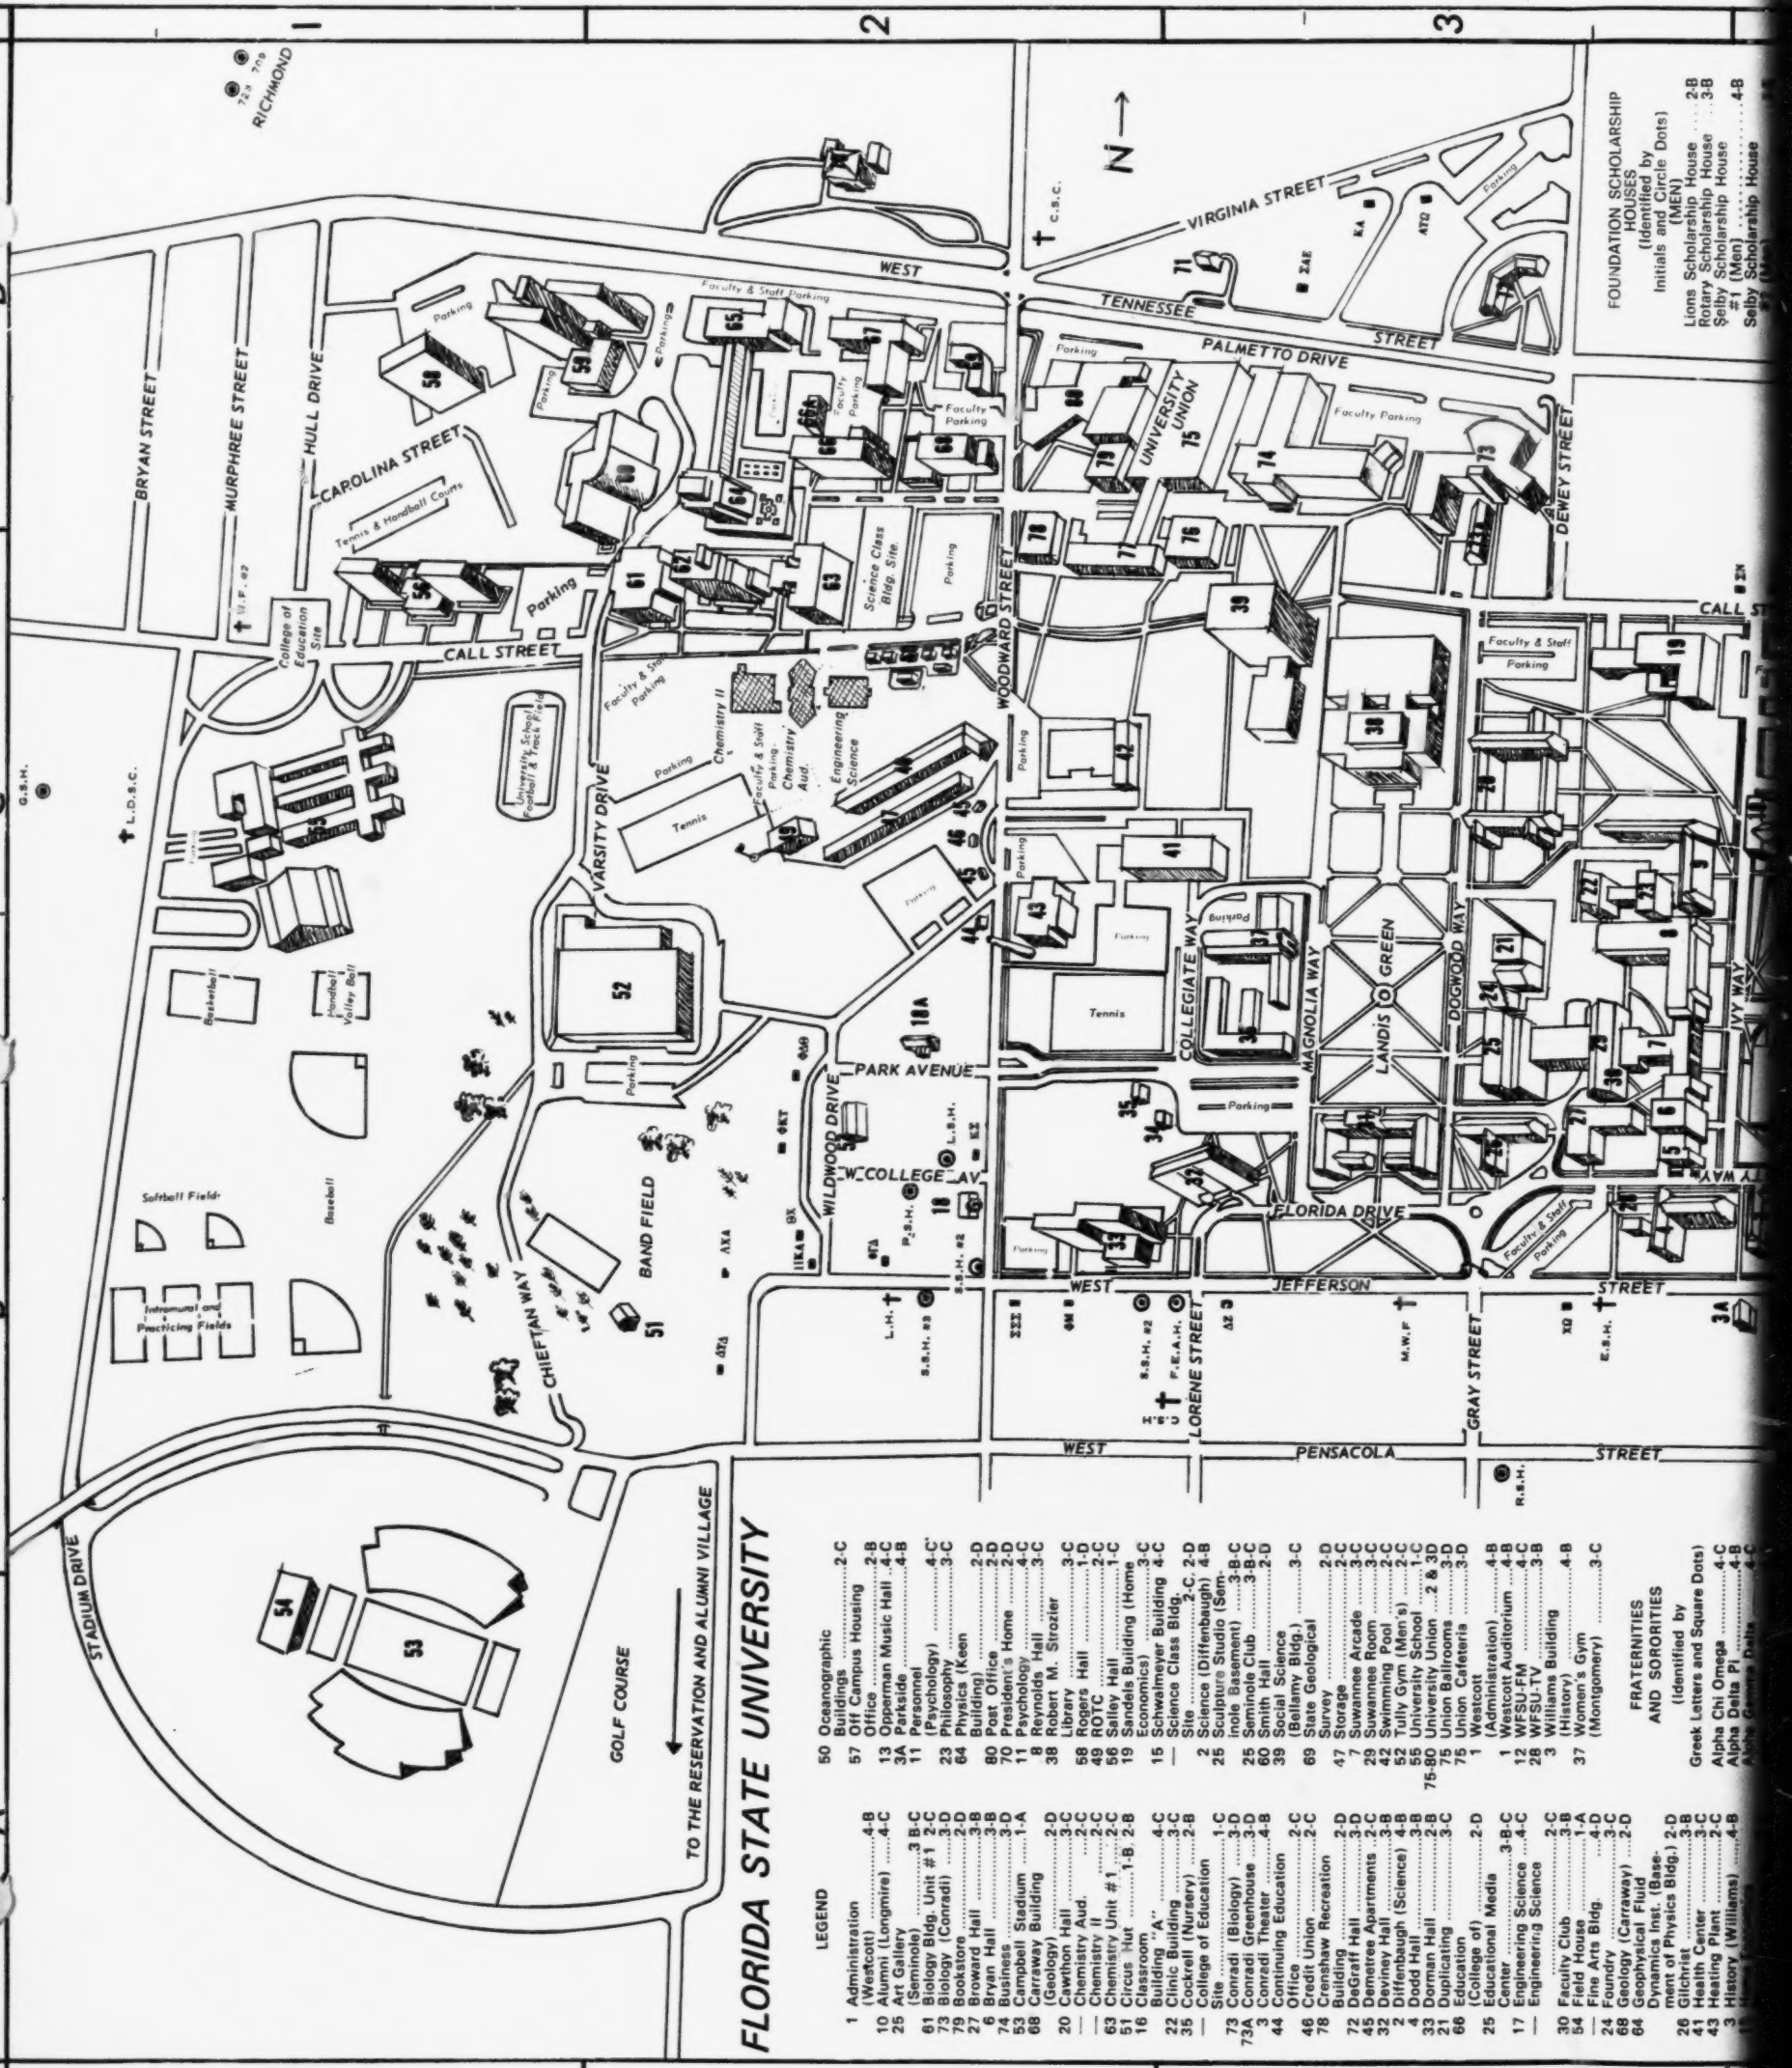

Trust Funds

Those funds, other than General Revenue, used to support the operation of the University. They might include student fees, miscellaneous sales, contract and grant indirect cost allowance, etc. For summary purposes, contracts and grants are also considered to be trust funds.
